Summary

Full Stack Developer with 1 year 10 months of professional experience building scalable enterprise web applications using **React.js, Next.js, Python, Django, FastAPI, and SQL Server**. Experienced in designing RESTful APIs, developing responsive frontend interfaces, implementing authentication systems, optimizing database performance, and delivering production-ready applications.

Education

Bachelor of Technology (B.Tech) in Artificial Intelligence and Data Science 2021 – 2025
N.B.K.R Institute of Science and Technology

Experience

Graduate Trainee Engineer – Full Stack Developer — Greentech Industries Jan 2025 – Present

- Developed scalable web applications using **Next.js and React.js**.
- Designed and implemented REST APIs and integrated frontend with backend services.
- Worked with **SQL Server** for complex queries, joins, stored procedures, and CRUD operations.
- Improved application performance by optimizing API responses and database queries.

Technical Skills

Languages: Python, JavaScript, SQL
Frontend: React.js, Next.js, HTML5, CSS3, Tailwind CSS
Backend: Django, REST APIs, Authentication
Database: SQL Server, SQLite, Prisma ORM, Database Design, Query Optimization
Tools: Git, GitHub, Postman, VS Code
Concepts: DBMS, JWT Authentication, CRUD Operations

Projects

Change Management System — Next.js, React.js, SQL Server

- Developed an enterprise workflow management platform for Engineering Change Requests (ECR).
- Built dashboards, approval tracking modules, reporting systems, and document management features.
- Designed and optimized SQL Server stored procedures, CTEs, joins, and reporting queries.

Security Management System — Next.js, React.js, SQL Server

- Developed a security management application for visitor registration, approval, gate entry, and check-in/check-out workflows.
- Integrated Next.js frontend with APIs and SQL Server stored procedures for secure data management.
- Implemented form validation, status tracking, searchable data tables, and visitor pass generation.

Fake Job Detection System — Django, Machine Learning, Python

- Built a classification model using TF-IDF and algorithms like Random Forest and Logistic Regression.
- Integrated the ML model into a Django backend for real-time job post prediction.

Certifications

- Python Full Stack Internship — Coding Brains
- Full Stack Developer Internship — Greentech Industries
